IN THE SKY

**In the sky, is all we need to know
Watch our worries grow, like a thunderhead**

**In the sky, sketched in subtle hints
Dares us to make sense, of all the mystery**

***In the sky, in the sky, in the sky
In the sky - - - - - in the sky***

**In the sky, the secret to our fame
But who do we get to blame, when we're turned out on skid row**

**In the sky, stories yet untold
All the secret code, to all the mysteries**

***In the sky, in the sky, in the sky
In the sky - - - - - in the sky***

**In the sky, lay all our history
Plain for all to see, a million years and change**

**In the sky, sum of all our fears
Debris from all the years, all the things we claimed to know**

***In the sky, in the sky, in the sky
In the sky - - - - - in the sky1***
